TV series

Add a season

1. Add the files for an additional season to the server
2. Naming convention: <series name> S01E01 for season 1 episode 1
3. Select the season in NMJ Toolbox, then click the [TV] icon “Query the TVDB”
4. If the episode names are not recognized, name the episode: <series name> S01E01 <episode name>
5. Find the corresponding images by selecting the season and clicking [TVDB Images]
6. If no images can be found, drag and drop an image file to the image location

Move a season

If a season is wrongly recognized as movie, do the following:

1. Start NMJtoolbox, then open the database (make sure the database is found through a drive letter, eg. V:)
2. Find the TV series name in movies, then right-click
3. select **Move to new TV show**
4. If afterwards not all TV series are recognized through the front-end, click **Utilities** in NMJtoolbox, then click **Fix TV errors**
