

Sendmail

1. If sendmail isn't installed, install it:

```
sudo apt-get install sendmail
```

2. Configure /etc/hosts file, make sure the line looks like this:

```
127.0.0.1    localhost    yourhostname
```

3. Run Sendmail's config and answer Y to everything:

```
sudo sendmailconfig
```

4. Restart apache:

```
sudo service apache2 restart
```
