

X11 remote

The following instructions work for Windows 11 with WSL2 installed, which includes WSLg, the built-in XServer client.

On remote machine

- Edit sshd_config:

```
X11Forwarding yes  
X11UseLocalhost yes
```

- Restart with service sshd restart

On local client

The screenshot shows the PuTTY Configuration dialog box with the 'X11' category selected in the left-hand tree. The right-hand pane is titled 'Options controlling SSH X11 forwarding' and contains the following settings:

- X11 forwarding**
 - Enable X11 forwarding
 - X display location: localhost:0
 - Remote X11 authentication protocol:
 - MIT-Magic-Cookie-1
 - XDM-Authorization-1
 - X authority file for local display: [Empty text box]

At the bottom of the dialog are buttons for 'About', 'Help', 'Open', and 'Cancel'.
