Wake-on-Lan

Linux Host

- Install `wakeonlan`

```
sudo apt install wakeonlan
wakeonlan <MAC-address>
```

Windows Client

- Enable in BIOS: Restart your PC and access the BIOS/UEFI. Look for “Power Management,” “ACPI,” or “Wake on LAN” and enable it.
- Configure Windows: Go to Device Manager > Network Adapters, right-click your Ethernet adapter, and go to the Power Management tab. Check “Allow this device to wake the computer”.
- Identify the MAC Address of your PC. Open a command prompt, then type:

```
getmac /v /fo list
```
