

MySQL 5.5

Upgrade

If upgrade cannot configure MySQL, then you need to run [mysql_upgrade](#)

```
mysql_upgrade --user=<user> --password=<password>
```

Make sure the data directory is rwx for the mysql user. You might also want to consider [How to change Mysql data directory location](#)

Additional packages

```
apt-get install mysql-utils
```

Configuration

- [MySQL Memory Allocation](#)
