

Debian 8.6 Desktop Client (Mimas) on Fujitsu Lifebook S6410

Hardware

Installation

1. Download [Debian 8.6 XFCE](#) to a bootable USB stick
2. Power up and hit F12 for the boot menu, then boot from USB
3. Choose /home in a different partition, leave all other settings on default
4. Boot into installed desktop
5. Remove LibreOffice with

```
apt-get remove --purge libreoffice*
```

6. Install OpenOffice from the [Unofficial Apache OO Debian repository](#)
7. Add a “non-free” component to /etc/apt/sources.list (taken from [Intel PRO/Wireless 3945 and WiFi Link 4965 devices](#))

```
deb http://httpredir.debian.org/debian/ jessie main contrib non-free
```

8. Update the list of available packages and install the firmware-iwlwifi package

```
# apt-get update && apt-get install firmware-iwlwifi
```

9. As the iwlegacy driver is automatically loaded for supported devices, reinsert driver modules to access installed firmware

```
# modprobe -r iwl3945 && modprobe iwl3945
```

10. Uncomment the languages you need in /etc/locale.gen and run

```
# locale-gen
```

11. Configure [Xorg](#)
