

# Audacity 2 (apt)

## Installation

- Install with:

```
sudo apt install audacity
```

## Remote control

I use an Android tablet to remote control my Audacity installation on the server.

- Install “XServer XSDL” on your mobile device
- Add the following commands to ConnectBot on your mobile device

```
export DISPLAY=localhost:0  
export PULSE_SERVER=tcp:localhost:4713  
xfwm4 & firefox
```
