UFW Firewall

1. Install with:

```
apt update
apt install ufw
```

2. Check preset profiles and allow necessary services as root:

```
ufw app list
ufw allow OpenSSH
ufw allow Samba
ufw allow 1194 # OpenVPN
ufw allow 3493 # NUT
```

3. Enable firewall and check status:

```
ufw enable
ufw status
```
