

Upgrading a DokuWiki installation

1. Check the changes of the new version [here](#) and pay attention to items marked  which need to be considered while upgrading.
2. Download the latest version [here](#)
3. Unpack the tarball:

```
tar -xzvf dokuwiki-xxxx-xx-xx.tgz
```

4. Overwrite the existing installation:

```
cp -R dokuwiki-xxxx-xx-xx/* ~/www/wiki
```

5. Fix ownership and permissions
6. Remove deprecated files according to [this](#) list.
7. Command to delete a list of files:

```
find -name file.name | xargs rm -fv
```
