

Bugs

Joomla 3.10.2 and PHP 8.1

- You cannot update Joomla 3.10.2 to a higher minor version when running PHP 8.1, or update extensions, due to a bug in file `/libraries/src/Table/Table.php` and/or `/libraries/src/Table/Extension.php`. This might apply to other Joomla 3.10.x minor versions, but is fixed with Joomla 3.10.11 or before. A temporary fix to allow upgrading to Joomla 3.10.11:

```
$ sudo vim /libraries/src/Table/Table.php
line 180: $fields = $this->getFields(); --> $fields =
$this->getFields(true);
```

- Update Joomla to version 3.10.11, after which the site works correctly again.
- Update packages for [Joomla 3.10.11](#)
