

Migrate Server

Automatic backups

- Create folders ~/batch, ~/site-backup and ~/logs and give them correct permissions
- Add your user to group www-data with one of below commands then logout and login again:

```
sudo adduser <user> <group>  
sudo usermod -aG groupname username
```

- Create a SSH keypair and copy the public key to your receiving server
- Modify access parameters in task for our receiving server
