

# MySQL queries for db maintenance

Add a new configuration for an IPL or SIDL website in phpMyAdmin:

Operations: First, copy the entire table #\_\_ipl\_brackets to a new table bracket\_backup

Make changes to the brackets in bracket\_backup, and assign a new config id <cid>

SQL: INSERT INTO #\_\_ipl\_brackets (config\_id, division\_id, bracket, games, legs, players, title)

SELECT config\_id, division\_id, bracket, games, legs, players, title FROM bracket\_backup WHERE config\_id=<cid> ORDER BY id

Add a new row to table #\_\_ipl\_config
