

# MySQL queries for db maintenance

Add a new configuration for an IPL or SIDL website in phpMyAdmin:

Operations: First, copy the entire table #\_\_ipl\_brackets to a new table bracket\_backup

Make changes to the brackets in bracket\_backup, and assign a new config id <cid>

```
SQL: INSERT INTO #__ipl_brackets (config_id, division_id, bracket, games, legs, players, title)
```

```
    SELECT config_id, division_id, bracket, games, legs, players, title FROM bracket_backup WHERE config_id=<cid> ORDER BY id
```

Add a new row to table #\_\_ipl\_config
