

Module nextEvent

Description

Module nextEvent from [Ewout Wierda](#) allows to display the next upcoming event from EventList with a countdown. Unfortunately, the original module does not honour the access restrictions of the categories of the events, that's why this changed module was created.

Changes

- Base module copyright owner: [Ewout Wierda](#)
- Base module version: 1.5.1
- Tested with: Joomla 1.5.8 - 1.5.10
- Files changed: mod_nextevent.php
- Change marks: find **bco** in the file
- Download: [bco_nextevent_1_5_1.zip](#)
- Install: replace mod_nextevent.php or re-install the module with the downloaded zip file
