

Setup for Joomla 5

Replace Bethico League 3.10

1. Uninstall component Bethico
2. Install component BethicoLeague
3. change database table config
4. change database table venue
5. merge *Member Menu* into *Main Menu*
6. reassign all Bethicoleague views
7. run Bethicoleague:Tools:MenuSetup and assign menu icons and translatable menu titles
8. set Logout view if something else than Home is requested
