

# Extract tracks from DVD or BD (Bluray Disc)

1. Extract the video from the DVD with [MakeMKV](#) and create a single mkv file
2. Use [gMKVExtractGUI](#) to extract the audio track as wav file and the chapter file from the mkv file
3. Use [Audacity](#) to separate tracks
  1. Import the wav file
  2. Select **Edit -> Labels -> Edit Labels...**, then enter the track name and chapter start and end times provided in the chapter xml file
  3. Select **File -> Export -> Export Multiple...** and chose mp3 or flac as format.
4. Use [Audacity Audio Helper](#) to tag the exported music tracks and move them to your destination directory.
