GIMP 2.10

How tos

Apply transparent background in GIMP

1. Select Layer → Transparency → Add Alpha Channel
2. Select the background using the Fuzzy Selection Tool (Magic Wand) and press the Del key.

GIF will allow you single-color transparency, while PNG has full alpha channel support.
See also GIMP Watermark removal

Change color of text within selection

1. Select layer with color area to be changed, *Select –> All*, select this color area with the *Fuzzy Select Tool*, *Select –> Invert*.
2. Select layer with text and click text within color area, this should result in selection around text within color area. Make layer with color area invisible.
3. Click *Select –> Selection Editor*, set *Opacity* to 100, *Threshold* to 80 (normal font weight) or 120 (bold), *Fill by* to Alpha, and enable *Antialiasing*. Shrink the selection by 1px in *Select –> Shrink*.
4. Select *Bucket Fill Tool*, choose foreground color, and click on each letter within the color area.

Text along path

1. *Layer –> New Layer* and select it
2. Make a selection, for example a circle with the **Ellipse Select Tool** by holding down CTRL-SHIFT while drawing
3. *Select –> To Path*
4. For bottom (footer) text omit next step
5. For top (header) text select the **Flip Tool**, Direction Horizontal, then click into the circle path of the same layer
6. Select the **Text Tool**, choose any location in the same layer then write and format the text
7. Right-click on the text or right-click on the text layer to the right, select **Text along Path**
8. Add another new layer and select it, then *Select –> From Path*
9. Select the **Bucket Fill Tool** and fill the selection with the foreground color
10. *Select –> None*
11. Select the **Rotate Tool** and rotate the text, then hit the **Enter** key on your keyboard
12. *Layer –> Layer to Image size*
13. Delete any layers not needed anymore

Alternate text along path

- Create selection, for example a circle, then select *Selection to path*.
- *Invert* the selection if the text needs to follow /\ instead of \/. Select *Invert* and click next to the path.

- Write the text and select *Text along path*.
- Create new layer and select *Path to selection*. Hide other layers and fill the selection with color.

Remove background

1. Right-click on the layer, select *Layers –> Add Alpha Channel*
2. Right-click on the layer, select *Layers –> Duplicate Layer* (not necessary, just to be save to have a backup)
3. Make copy visible only, then *Select All*, then select the *Fuzzy Select Tool* and click into the background area
4. Select *Selection to path*, and again *Path to selection*, and make the path visible
5. Right-click on the layer, select *Add Layer Mask...*, choose *Selection* and click *Add*
6. Go to *Image –> Fit Canvas to Selection*, and save
