

# Cronos

Company laptop 2013-2016 on Windows 7.

## Structure

- C: System Drive (SSD partition 1)
- D: Data Drive (SSD partition 2)
- H: Home Drive (USB)
  - PortableApps (all portable apps binaries go here)
  - PortableCustom (all programs which are portable but do not have a PortableApps binary go here)
  - PortableSettings (custom settings to modify PortableApps)

## Setup

1. Netinstall from Durr
2. Install US English, Swiss (German), Korean, and Thai keyboard. Uninstall UK English and German keyboard. Make US English default.
3. Run (Win-R) **shell:sendto** and add notepad.exe (from C:\Windows) and wordpad.exe (from C:\Program Files\Windows NT\Accessories) to the *Send to* shell command.
4. **Per-user Startmenu:** C:\Users\[username]\AppData\Roaming\Microsoft\Windows\Start Menu
5. **All user's Startmenu:** C:\ProgramData\Microsoft\Windows\Start Menu

## Installation Permanent

1. Install **Internet Explorer 11** through Windows Update
2. Connect existing private Outlook **.pst** files to Outlook. Click *File -> Open...* to open the .pst file, then add a new Email Account in Account Settings. Select *Deliver new messages to: Existing Outlook Data File*.
3. Install TrueCrypt 7.1a. Download it from [TCnext](#) (x64).
  1. register a script to mount home drive on system startup in **Control Panel > Administrative Tools > Task Scheduler**

```
"C:\Program Files\TrueCrypt\TrueCrypt.exe" /v E:\volume.tc /lh /a /p <password> /q
```
  2. follow article [Tasks and Task Scheduler](#) how to do register
  3. more secure: create a Desktop shortcut to TrueCrypt.exe with the same options as above except the /p option.
4. Copy all data from drive D: to new drive D:
5. Install [Synology Assistant](#)
6. Install the **ownCloud** desktop client from the web interface of the ownCloud server, then reestablish all sync folders
7. Install [Snagit 12](#)

8. Install additional printer drivers and software suites.
  - Seoul Office: [HP8600](#) (already installed)
  - Seoul Home: [HP8660](#)
9. Install the Logitech [Harmony Software](#)
10. Install the current [Java JDK](#) (x64)
11. Install [Blender 3D Creation Suite](#)
12. Install [OpenShot Video Editor](#)
13. Install [MP4Tools](#)
14. Install [OutlookDAV](#) and follow [Outlook to iOS Sync](#)
15. Install [Acronis True Image 2016](#)
16. Install [EaseUS Todo Backup Free 9.1](#)
17. Install [CoffeeCup HTML Editor](#)

Todo: Windows Virtual PC, WinImage, [iFunbox](#)

## Installation Portable

1. Copy **4NT401** to PortableCustom, then run the branding program. Make sure that the help file extension for older help file versions is installed from [Microsoft](#).
2. Install [Firefox](#) as PortableApp with the following add-ons
  - NoScript
  - Speed Dial
  - Xmarks
  - Adblock Plus
  - DownThemAll
  - Firebug
  - WOT
  - Modify the user agent if necessary: [Webcam access through modified user agent or referer](#)
3. Install [Google Chrome](#) as PortableApp
4. Install the Chrome [Secure Shell](#) extension. For Chrome PortableApp it does not show up in the list of installed extensions, you need to start it manually. To do so, add a link to Chrome with the following URL to open: chrome-extension://pnhechapfaindjhompbnflclldabbghjo/html/nassh.html. The icon is at H:\PortableApps\GoogleChromePortable\Data\profile\Default\Web Applications\\_crx\_pnhechapfaindjhompbnflclldabbghjo\Secure Shell.ico. You must then import both the server's public and private key files in any order.
5. Install [VLC](#) as PortableApp
6. Install [FileZilla](#) as PortableApp
7. Install [XnView](#) as PortableApp
8. Install [Xenon File Manager](#) as PortableApp
9. Click extensions and assign default program manually through *Browse...*
10. Install [XAMPP](#) and [XAMPP Launcher](#) as PortableApp. Install to folder h:\xampp, where h: is your portable drive. If you install a shortcut on the desktop, link it to *XAMPP Control Panel* in PortableApps, which was created when you installed XAMPP Launcher. Make sure a current JRE is installed.
11. Install or Copy the [Eclipse](#) development environment, which is fully portable, to PortableCustom. Make sure you have Java properly installed, see [Eclipse IDE](#).
12. Modify the [XAMPP Settings](#), copy the *MySQL DBs* for the sites you want to develop, and register

the MySQL users. Do not assign a root password.

13. Install [OpenOffice](#) as PortableApp
14. Install [RealVNC](#) Viewer as portable. To do so, run the installer, then copy *vncviewer.exe* to PortableCustom folder, then uninstall RealVNC
15. Make a shortcut to H:\Batch\icons.bat
16. Download [DesktopOK](#) and copy it to a folder within PortableCustom. Start the program and save the current icon positions and quit, then move to newly created ini file from %APPDATA%\DesktopOK to the folder with the exe file.

Todo: Media Monkey (install portable), RSSOwl
