Fix Silverlight crash

1. Click Start, select Run.
2. Type SERVICES.MSC
3. Press ENTER.
4. The Services program shall initiate a list of all the services, both running and stopped. Scroll down to see the status of **Tablet PC Input Service**.
5. If it is stopped please right click it, select **Properties**. In the new dialog, select Startup Type as Automatic. Then click **Start | OK | Close**. This shall fix Silverlight crashing issue.
