

Install additional keyboard layout in Windows XP

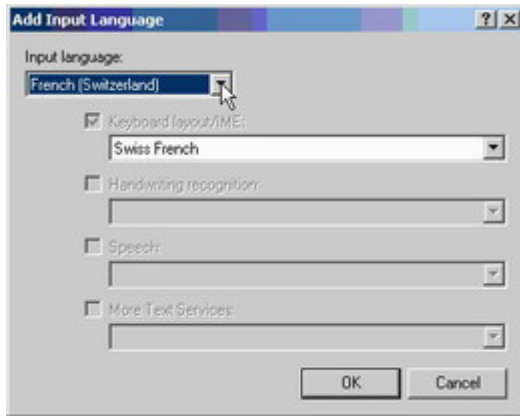

1. Click **Regional and Language Options** in **Control Panel**

2. Select **Languages**, click **Details...**, then select **Settings** and click **Add...** to add additional keyboard layouts

3. Select desired input language, then select checkbox **Keyboard layout/IME** and select desired keyboard layout ¹⁾

4. Click **OK** to close all the windows and to make the changes permanent ²⁾

1)

The keyboard layouts already installed in the system do not appear in this list anymore

2)

If the language or the keyboard setting has not been previously installed, Windows will ask for the Windows XP installation CD to copy the necessary driver files
