piCorePlayer 9.0.1

- A SqueezeLite player on the Raspberry Pi

1. Download piCorePlayer v9.0.1 32 Bit which will work on a Rasberry Pi v1
2. Burn the image to a SD card, 4GB is more than sufficient
3. The built in audio ouput will work out of the box
4. To use a DragonFly USB audio device:
    1. Open the settings page by navigating to the player's IP address in your browser
    2. In Squeezelite Settings set Audio output device settings to *USB audio* and save
    3. In Change Squeezelite settings set Output setting to *hw:CARD=DragonFly,DEV=0*
