GIMP 2.8

Change color of text within selection

- Select layer with color area to be changed, *Select –> All*, select this color area with the *Fuzzy Select Tool*, *Select –> Invert*.
- Select layer with text and click text within color area, this should result in selection around text within color area. Make layer with color area invisible.
- Click *Select –> Selection Editor*, set *Opacity* to 100, *Threshold* to 80, *Fill by* to Alpha, and enable *Antialiasing*.
- Select *Bucket Fill Tool*, choose foreground color, and click on each letter within the color area.
