

Windows Activation

Activate by phone

Enter the phone activation by clicking "Run...", then

```
slui.exe 4
```

Select a country, for example Thailand, and select the number starting with +65 which is an English speaking automated phone system in Singapore.

Follow the instructions, then read or enter on your phone's keyboard the 8 identification IDs (no. 1 - 8) with 6 numbers each. After confirmation, the activation phone will read you the activation IDs (id. A - H), which are again 6 numbers each.

Done
