

# Registry Tweaks

## How to Fix Slow Access to Network Shares

- Create DWORDs in HKEY\_LOCAL\_MACHINE\System\CurrentControlSet\Services\Lanmanworkstation\Parameters and set them to zero:

DirectoryCacheLifetime	REG_DWORD	0x00000000 (0)
FileInfoCacheLifetime	REG_DWORD	0x00000000 (0)
FileNotFoundCacheLifetime	REG_DWORD	0x00000000 (0)

## Disable Windows Copilot

- Create key WindowsCopilot in HKEY\_CURRENT\_USER\Software\Policies\Microsoft\Windows and add DWORD within WindowsCopilot:

TurnOffWindowsCopilot	REG_DWORD	0x00000001 (1)
-----------------------	-----------	----------------
