

User Management

User Properties

Home Editions

Open **Run** and type *netplwiz*

Professional Editions

Open **Control Panel** > **System** > **Computer Management**

Auto logon

Set the following keys in [HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\Winlogon]

```
"AutoAdminLogon"="1"  
"DefaultUserName"="myname"  
"DefaultPassword"="mypwd"  
"DefaultDomainName"="mydomain"
```

The domain name entry is not needed for a private LAN with workgroup, but if you set it, set it to the name of your machine (computer) all in caps letters.

See [Log On Automatically at Startup](#)
