

Install DokuWiki

Extract [DokuWiki](#) base to the wiki sites' root directory <root>

Extract [Monobook for DokuWiki](#) template to <root>/lib/tpl directory

Extract [Display Wiki Page for DokuWiki](#) plugin to <root>/lib/plugins directory

Extract [Discussion for DokuWiki](#) plugin to <root>/lib/plugins directory

Extract [gCalendar for DokuWiki](#) plugin to <root>/lib/plugins directory

Move the DokuWiki installation directory on the server

```
mv -R <root> <newroot>
touch <newroot>/conf/local.php
```

Note: the touch on one of the config files flushes DokuWiki's cache and forces to reload path and page information.
